LLM Apps
LangChain: LangServe

Problem

- We want to build an API for our LLM App.

Solution

- We use LangServe from LangChain.

- Important notes:
  - LangServe is still in Beta phase.

  - Options:
    - From Jupyter Notebook
    - From an editor
    - From the terminal

Process

- Basic code for the Jupyter Notebook option.
- Link to the Playground to test the application.
- Link to the API routes.

Other

- For more info, see LangSmith Documentation.
